HEALTHY TIPS FOR 2020

It Takes Approximately 20 Minutes for Your Brain to Know Your Stomach is Full:

From the time you start eating, it takes about 20 minutes for your stomach to signal to your brain that you are full. Eating too fast can result in serious consequences that include weight gain, indigestion, acid reflux, and an overall feeling of dissatisfaction after a meal. Eating slowly can lead to eating smaller portions and help maintain or lose weight
